

Typical Specification

For laying resin bound aggregate surfacing

Topping

Sudscape Resin Bound Topping 20mm

Base

Sudscape Bound Recycled Tyre 30mm

Sub base – to be installed by others

Typical specification dependant upon ground conditions:

200mm for car parks and driveways,
150mm for pathways of Type 3 aggregate
suitably compacted

This specification is based upon standard good practice for flexible surfacing and must be adapted by the client to local conditions to provide a stable porous sub base

It is the responsibility of the Specifier to design a construction suitable for the expected traffic and the ground conditions of the site
